Z300

The most efficient heat pump all year round

Choosing the right heating

Z300

For in-ground pools up to 110 m³ water volume

Suitable for all types of water treatment (chlorine treatment, salt or bromine chlorinator, ozone, etc.)

Heat pumps are the most economical heating solution because nearly 80% of the energy used to heat your pool comes from the air!

E.g.: 1 kW of electricity consumed = 5 kW returned to your pool.

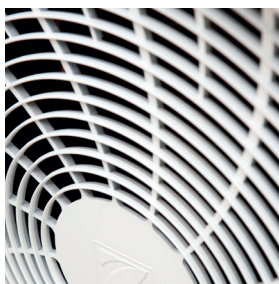

The ratio between the power that the heat pump supplies to the swimming pool and the power it consumes is called the COP (Coefficient Of Performance). The higher your COP, the more efficient your heating equipment and the lower your electricity consumption. Because we pay close attention to users' requirements, **Zodiac® heat pumps have the highest COPs on the market.** This means you are investing in efficient, economical equipment.

Certified performance

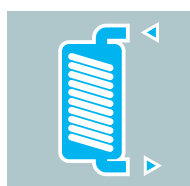

Zodiac® swimming pool heat pumps are among the only ones on the market certified to the French heat pump standard.

The NF standard proves that the performance coefficients we claim are certified. NF certification is a true measure of our commitment to provide performance, quality and service for our customers and the end user!

Quiet operation

With the Zodiac® guarantee, you benefit from one of the quietest heat pumps on the market, data certified by the Le Mans Technology Transfer Centre (CTTM) according to EN ISO 3741 and EN ISO 354 standards.

Reliability

With its patented titanium heat exchanger, Z300 can heat any swimming pool water, whatever its source and how it is treated (treated with chlorine, salt chlorinator, bromine, ozone, etc.).

SPECIFICATIONS	Standard models				Reversible models			
	Z300 M4	Z300 M5	Z300 T5	Z300 M7	Z300 MD5	Z300 MD8	Z300 TD5	Z300 TD8
Pool volumes	Up to 110 m³							
Efficiency: Air at 28°C / Water at 28°C / Humidity 80%								
Power returned (kW)	9	13	13.1	16.1	13	13.1	21	21
Power consumption (kW)	1.6	2.4	2.3	2.9	2.4	2.5	3.7	3.8
COP (Coefficient Of Performance)	5.6	5.5	5.6	5.6	5.9	5.8	5.6	5.5
Efficiency: Air at 15°C / Water at 26°C / Humidity 70% - NF certified								
Power returned (kW)	7.6	10.4	10.5	13.7	10.4	10.5	15.5	15.5
Power consumption (kW)	1.7	2.2	2.2	2.9	2.2	2.2	3.6	3.6
COP (Coefficient Of Performance)	4.5	4.7	4.7	4.7	4.7	4.7	4.3	4.3
Power supply	Single phase	Single phase	Three phase	Single phase	Single phase	Three phase	Single phase	Three phase
Sound pressure at 10 m (dB(A))	39	40	42	39	40	42	37.1	37.1
Minimum operating temperature	5°C				-8°C			
Inversion cycle: defrosting and cooling	No				Yes			
Can be installed in a plant room	Yes							
Remote control	As an option							

Shipped with:

- Winter cover
- 3 year manufacturer's warranty
